INNOVATIVE TECHNOLOGY IN TIMELESS DESIGN

A crackling fire draws the eye and invites you to relax in front of the fireplace. If you want to experience fire in exclusive style, let yourself be inspired by the impressive variety of extraordinary LIVING FIRE stoves by Spartherm. Manufactured in Germany with high-quality select materials, the current models combine innovative stove technology and pioneering design in harmonious perfection. To make the fire experience even more personal, numerous modifications have been developed to customise each stove to suit your own needs. Numerous LIVING FIRE models also feature the sophisticated „S-Thermatik NEO basic“ combustion control system, which uses the fuel to maximum efficiency in the spirit of sustainability. At the same time, the optional thermal storage elements provide even more cosy warmth and a feel-good ambiance in the firelight.

LIVING STYLES – A FIRE FOR EACH STYLE

Elegant design classics in vintage style, modern Scandinavian furniture or purist minimalism: personal furnishing styles often reveal a person's deepest wishes and needs. After all, the design of your personal haven of relaxation is a very individual decision. If you can evoke emotions and create harmonies through furniture and decorations, you will feel comfortable in your own home. Then the only thing missing is an open fire to warm your body and soul. That is how you create a place that naturally connects with stories and with people - a real home.

So it is no wonder that more and more people have come to appreciate this special homely feeling. That is why Spartherm has designed its LIVING FIRE product range with so many variants so that the stoves can be freely positioned in the room to create unique accents in the ambiance. Thanks to the innovative design ideas of the Spartherm experts, the stoves fit seamlessly into any individual furnishing concept – for a tasteful, exclusive and stylish addition to your home.

The round shape is what makes the Passo so charming. Clean lines and a no-frills design allow this stove to harmonise with a wide variety of furnishing concepts in its discreet and calming manner. At the same time, the Passo has a certain presence, but as a slender column it is also elegant and not too dominant.

SMART FIREPLACE ASSISTANCE FUNCTIONS

S-USI II

PASSO

Elegance and performance

Additional available models such as the Passo XS in a rather small compact design and the Passo L as a high column are equally impressive. All Passo variants present the blazing fire at the centre of the stove at a 180 degree angle. This creates a natural feel-good atmosphere.

The Passo XS style is available in an inspiring array of modern colours. The handle and the base are made of real wood and give the extraordinary stove a young and urban look, just like the soft edges of the steel body. The unique, specially developed 180-degree panoramic glass creates a beautiful stage for the fire.

In addition, the exceptional style is underlined by smart assistance functions. For instance, the electrically controlled "S-Thermatik NEO basic" makes sure that the logs in the stove burn evenly and effectively. Moreover, an electrically operated underpressure control can provide maximum safety in a smart way – that's LIVING FIRE by Spartherm at its best!

PASSO

Unique on three legs

Passo XS tripod | Nero

A design highlight for any home. The Passo XS tripod is a stove that rests majestically on a pedestal like a piece of furniture and unites the best of both worlds. Its three legs not only ensure the Passo XS tripod is stable, they also make it a defining style element in any furnishing concept.

As safety is a top priority for all stoves in the Living Fire by Spartherm range, the smart underpressure control has also been developed for this model. In this model the latest innovative combustion technology meets today's fashionable style. This unique look is a true eye-catcher for an extraordinary ambiance.

The Trico stove is available in two sizes: both models score with their clear design, compact shape and high energy efficiency. With a basic square shape of 40 x 40 cm, the Trico S model is ideal where space is limited or for smaller rooms. The Trico L is identical in construction to the Trico S model and is characterised by its tall, slimline dimensions. Its size makes it ideal for rooms with higher ceilings, for example. An optional storage element can also be installed in the upper section of the Trico L.

Trico S | Copper

TRICO

U-shape for fire visibility
from three sides

The Trico stove is all about maximum fire visibility. „Tri“ stands for three. The combustion chamber is surrounded by three large-area panes. This means that the play of flames is perfectly visible from all points in the room. For special fire moments, the stove can be selected with black fireclay - the fire comes into its own particularly well against a dark background.

Technically, the Trico models score with infraredcoated combustion chamber glazing for reduced radiation distance, high combustion chamber temperatures and reduced soot buildup.

PIKO

The fire in focus

Piko H₂O | Copper

Piko S | Pearl

The clean, minimalist lines define the cubic character of all variants of this impressive stove. If desired, the Piko L can also be fitted with a stylish firewood compartment to emphasise its effect. In addition to its special look the Piko H₂O model also features an appealing aspect that the other stoves of this series do not have. This particular stove is equipped with a water heat exchanger. That is how – practically as an aside – it provides hot water to your whole home. This is what smart sustainability looks like.

There's an edge to this model that you are sure to love. Offering a view of the flickering flames from different perspectives, Piko models are designed to fascinate. This stove opens up exciting views and insights from two sides, making it an eye-catching design element for open-plan living spaces.

Solid and reliable. The Piko S steel is made of perfectly crafted 6 mm thick steel. This modern stove with its angular shape looks timelessly elegant. The full-glass combustion chamber door with attractive corner glazing grants you a unique view of the blazing fire from all sides. This allows the Piko S steel with its unique look to attract attention as a design element in the middle of the room.

LUNGO

Strong and powerful

Lungo 2L | Turquoise

A fire that fascinates from every angle. The Lungo from Living Fire by Spartherm presents an impressive pattern of flames with a unique clean, seamless design that will delight you from several perspectives. For example, this stove can elegantly connect two rooms with a special fire experience.

The Lungo stove can be used to accentuate any ambiance in your personal style. For optimal architectural integration, you can choose freely whether you wish to open the door of the stove with the handle to the left or right, but that's not all: An array of exclusively designed colours is available for the surfaces. Whether pearl, turquoise, nickel or magnolia, the Lungo can be adapted to personal taste with a variety of different colours – for a design with a strong presence.

LINEAR MODULE

Room for fire

Linear Module XS

The experience of fire is the focus in the Linear Module. This stove's all-black design creates the perfect stage for the flickering flames, even in compact spaces thanks to the Linear Module XS. If you prefer a large combustion chamber instead, you will find the Linear Module M the perfect companion for a cool winter's evening.

The various stove models are accompanied by a gracefully designed bench that not only supports the combustion chamber but also provides space for the wood supply – for pure enjoyment of fire.

SENSO

Experience with all senses

Senso L | Copper

The flames flicker and make the wood crackle – the Senso stove will fascinate you with its generously curved panoramic glass and its harmonious design, which can be adapted to your personal ambiance thanks to a wide range of available colours. The oval and balanced shape of the Senso allows a perfect equilibrium between slim appearance and space for a high blazing fire.

Senso M H₂O | Nero

For those who want to act sustainably, the Senso M H₂O is a stove that features not just an extraordinary design but also technical innovation for the benefit of the environment. This is because the Senso M H₂O has a water heat exchanger that automatically heats water for your home while the fire is burning, thereby saving resources.

SENSO

Design meets function

Senso L fashion

With its special look, the Senso L fashion will fascinate you at first sight. Its concrete cover panels shape its extravagant design in a unique way. That makes this extraordinary stove with its large panoramic glass a style object for every modern ambiance.

The Senso L fashion can also be equipped with smart fireplace assistance functions of particularly high quality. The electric S-Thermatik NEO basic, for example, ensures that the wood burns efficiently and an underpressure control creates even more safety – for a relaxed fire experience.

SENSO

Timeless design in classic shape

Senso L klassik

With its high-quality cover panel made of the radiantly bright Portuguese limestone Porto blanco, the design of the Senso L classic is reminiscent of a Hellenistic column. The dark body and the light stone of the cover panel form an elegant contrast. This creates a visually interesting field of tension as an impressive frame for a crackling fire – for a unique fire experience.

With its smart assistance functions, Senso L classic is also perfectly equipped for the future. The S-Thermatik NEO basic, for example, automatically ensures that the logs burn evenly, while the electrically controlled S-USI II underpressure control safeguards the flickering flames.

SINO

A true classic

Cosiness has a name: Sino City. This unique stove from Living Fire by Spartherm brings nature into your home. Sino City is available in a variety of natural materials: Sahara colour sandstone, soapstone in a stylish grey or the light limestone Porto blanco.

The different natural stone cover panels radiate warmth and tranquillity. Their discreet appearance blends harmoniously into the style world of the respective interior design concept. In addition to the natural stones with their unique grain, a warming plate for a tea set and the spacious firewood compartment create a relaxing atmosphere inviting you to lean back and feel at peace.

SINO

Natural yet sophisticated

Sino L | Nero/Soapstone

In the classic compact Sino L, the inside is just as important as the outside. That is because its handle is integrated and only shows itself when you need it. If you want to keep an eye on your fire at all times, you can bring the Sino L into the desired position with just a slight turn (optional).

The blazing flames warm the unique natural-grained stone of the Sino L, which will fascinate you with its exceptional quality and workmanship. Depending on personal taste, a rosé-coloured Sandstone Sahara or a light-grey soapstone can be chosen for the cover panel. This creates a cosy ambiance that invites you to linger – for a lifetime.

The Cubo is a stove that will surprise you with its unique lines. Its gently rounded corners, which seem almost soft, combine harmoniously with the minimalist, modern overall design.

Whether as Cubo S in the compact version or in the tall version as Cubo L, Cubo models with their hinged door can be perfectly positioned in the corner of a room or directly in front of a wall. That allows this unusual stove in all its variants to enrich any ambiance with its discreet yet elegant presence.

CUBO

For unique style

Cubo L style | Turquoise

You fancy shape and colour? Then the Cubo L style with its generous glass across the corner is sure to whet your appetite for style with its many design variations. Be it the soft wood tone or the turquoise colour reminiscent of the ocean, with the Cubo L style modern trend colours and wood elements can be combined in many new ways – for a unique personal style.

To support this style in a smart way, Spartherm has developed some innovative assistance functions for the stove. For instance, the electrically controlled S-Thermatik NEO basic allows the wood to burn evenly in a CO₂-neutral manner. The electric under-pressure control, designed according to the latest state of the art, ensures maximum safety.

MORO

Pure nature

Moro | Nero/Sandstone Sahara

The Moro stove is covered in a stylish grey soapstone or in Sandstone Sahara with a rosé effect. This allows these natural stones to become part of a unique design shaped by nature and create an incomparable atmosphere in the room. The heat stored in this stove is released evenly and gently into the environment. The two integrated compartments keep tea or coffee warm on cold winter days and the wood dry for a roaring fire.

The Moro stove also has high-quality technical equipment: the smart fireplace assistance functions.

The electric S-Thermatik NEO basic, for example, enables the wood to burn efficiently and an underpressure control ensures even more safety so you can fully enjoy your fire.
