NATURAL HEAT WITH A MODERN DESIGN

Fascinating fireplaces

Natural warmth and a cosy atmosphere: The lively flickering of a real wood fire and its warm glow can add a unique, unmistakable flair to any interior. That's why a stylish stove is at the very top of many a home owner's wish list.

The Spartherm SIM collection is specially designed to make it as easy as possible to get your hands on that dream fireplace: Spartherm Installation Modules (SIM) are compact fireplaces with a modern design. They are based on pre-assembled elements that are easy, quick and simple to install. No changes to the architecture are required, as the units can be placed directly in front of a wall or freestanding in the room.

In addition to their time-saving prefabricated structure, SIM models feature innovative fire technology and a clear, timeless design. Their cladding surfaces are made of concrete – a material that is sure to last and creates the perfect stage for an open fire that will harmonise with any style of interior design.

WHY CHOOSE A
SPARTHERM SIM
FIREPLACE?

**MODERN
FIREPLACE DESIGN
IN CONCRETE**

PANELLED,
INSTALLATION-READY
FIREPLACES**

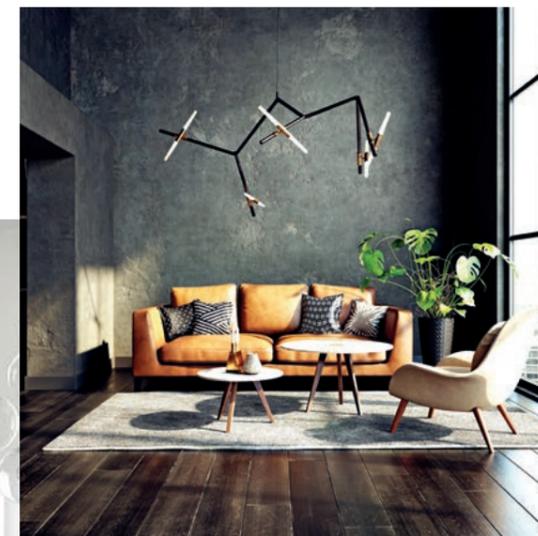

**QUICK,
SIMPLE AND CLEAN
INSTALLATION**

LIVING STYLES – VARIETY IS IN FASHION

When designing your home, you are spoilt for choice: Never before have there been so many different options for giving your living space your own personal touch! Authentic interiors with an individual flair are in fashion. Be it a monochrome white, beige and grey or elements in cosy shades of brown: A consistent colour concept makes any interior look modern and sophisticated. Where furniture and accessories are concerned, everything goes: Lovers of clean shapes and natural, high-quality materials will adore furniture in the fashionable Scandi style. Design classics like Mid-century Modern or Vintage Style give a home a truly elegant look. Minimalism is the style for anyone wishing to focus on only what is truly necessary. It's possible to mix styles and eras, the old and the new, to make any home look amazing.

But despite all this diversity, one thing remains true: Exquisite quality, good design and timeless style are never out of fashion. And that is what you get with a well-designed, high-quality fireplace from the Spartherm SIM collection.

You've got your new furniture, but is it still missing that certain something? Without a dash of naturalness, many interiors seem cold and impersonal. It's the little things that turn a new house into a cosy home. Warm, natural materials such as wood or leather. Beautiful fabrics, cushions and books. A harmonious colour concept to make you feel at ease. But nothing gives an interior as much power and cosiness as a fireplace. Because it's the warmth and atmosphere created by a fireplace that really lights up a room! With Spartherm's compact units, your dream of a fireplace can become true – quickly and with no hassle. The clean, timeless design adapts perfectly to any architecture.

SURFACES

Concrete nature

Smoothed fine-grained concrete

PURISM WITH PERSONALITY

The SIM collection fireplaces are available in two modern surface versions: You have the choice of our concrete nature design or smoothed fine-grained concrete.

Concrete is defined by a clean, unaltered aesthetic. The natural finish of the concrete surface is characterised by visible air inclusions resulting from production. This design has a strong personality and makes each fireplace a unique piece.

Alternatively, the fireplace surface is made of smoothed fine-grained concrete. This surface is processed to create a homogeneous, somewhat smoother feel. But even the fine-grained concrete finish has the distinctive roughness that is so typical of concrete.

Thanks to their timeless character, both concrete surfaces will fit seamlessly into any design environment.

SIM

Focus on
what really matters

SIM Mini Sh 1/3

VARIANTS

SIM Mini Sh | RLU A

4.9 – 9.1 kW

Perfect proportions: This geometrically simple SIM fireplace with a straight glass at its centre focuses on what really matters. The rectangular fireplace body is visually subtle, allowing the fire to draw the eye. The straight glass provides a clear, unobstructed view of the flickering flames.

SMART FIREPLACE ASSISTANCE FUNCTIONS

S-Thermatik NEO
(combustion control)

S-USI II
(underpressure control)

S-ESAM 3.0
(automatic sliding door)

SIM

For open-plan room layouts

SIM Varia 2L-55h 3/3

VARIANTS

SIM Mini 2LRh  A
 4.9 – 9.1 kW

SIM Varia AS-2Lh  A
SIM Varia AS-2Rh  4.9 – 9.1 kW

SIM
Varia 2L-55h | RLU  A
Varia 2R-55h | RLU  4.9 – 9.1 kW

SIM Varia 2Lh  A+
SIM Varia 2Rh  7.4 – 13.7 kW

The compact fireplaces of the SIM series are ideal for adding unique eye-catchers to a room. With their L-shaped glass windows, they provide a view of the flames from two sides. This is perfect for modern home layouts with open-plan areas and seamless transitions.

SIM

Fascination with depth

The Installation Modules of the SIM series can be individually adapted to your requirements and the conditions of your home. They are high-quality modular fireplaces with a stylish look and exposed concrete elements. You can choose from different sizes and basic forms. Particularly convenient with the optionally available electric sliding door S-ESAM 3.0 - or as a variant with water heat exchanger.

SIM Mini 2LRh 2/2

SIM Varia AS-2Lh 3/2

SIM

For open-plan room lay-
outs

SIM Varia 2Rh 2/3

SIM Varia 2R-55h 1/3

Making your dream of a fireplace come true doesn't have to involve the hassle of modifying the building structure. Spartherm fireplaces are fully panelled and installation-ready. They are positioned directly in front of the wall and look just like part of the architecture. Their design is perfect from all sides, making variable installation possible – just like a finished stove.

S-ESAM 3.0
(automatic sliding door)

* Compatibilities may vary for models.

VARIANTS

SIM Arte U-50h A+
 6.5 – 12.1 kW

SIM Arte U-70h A+
 8.0 – 14.8 kW

SIM Arte 3RL-60h A+
 7.0 – 13.0 kW

SIM Arte 3RL-60h 1/3

Fireplaces with U-shaped glass windows offer unique perspectives and fascinating views of the flames: In Spartherm's compact U-shaped fireplaces, the combustion chamber is clearly visible from any spot in the room. Their design is characterised by exceptional depth: The blazing flames that are visible from all sides generate light and warmth and create a beautiful atmosphere.

SIM Arte U-50h 2/3

SIM H₂O

Experience fire from two perspectives

SIM Varia 2L-55h H₂O 2/3

VARIANTS

SIM
Varia 2L-55h H₂O  A+
Varia 2R-55h H₂O  4.9 – 9.1 kW

SIM
Varia 2Lh H₂O  A+
Varia 2Rh H₂O  7.3 – 13.5 kW

Visually attractive and environmentally friendly at the same time: The H₂O versions of Spartherm's fireplaces generate warm water for your whole home in a sustainable CO₂-neutral way.

SIM H₂O

Experience fire from two perspectives

SIM Varia 2Rh H₂O 3/3

The water-conducting SIM variant strikes an impressive figure with a straight-lined corner solution that offers an unobstructed view of the flames from any spot in the room.
